1. All information portrayed on these plots is PRELIMINARY; it is based on the limited amount of engineering data available at this time, and is subject to change.

2. Median openings are subject to change; additional location may be determined based on the future traffic analysis, engineering design, and stakeholder input.

3. No right-turn tapers at unsignalized side streets are shown at this time; any such locations will be determined based on future traffic analysis, engineering design, and stakeholder input.

4. Sidewalks and/or bike paths are currently shown in approximate locations; it is anticipated that one or the other will be provided on both sides of North Avenue, subject to further engineering and coordination.

5. Existing and proposed property and right-of-way lines are approximate at this time, pending further survey and engineering design efforts.
